

Drone Defense for Correctional Facilities

www.skysafe.io info@skysafe.io

Correctional facilities are battling a perfect storm of overcrowding, understaffing, and a surge in drones used to smuggle contraband and conduct unlawful surveillance.

SkySafe's cloud-based drone detection technology meets this challenge head-on, offering vital protection by identifying, tracking, and analyzing unauthorized drones in your airspace to boost facility security and safety.

nearly

1M

Registered drones
in the US

nearly

10M

Consumer drones
shipped by 2030

7M

Value of contraband seized in a
drone investigation by Georgia's
prison system in 2024

\$100K

Estimated institutional value of a
single illegal delivery when seized

With more drones in the air, there are more threats to correctional facilities.

SkySafe enables Correctional Facilities to:

- **Prevent drone deliveries** of contraband such as cell phones, drugs, and weapons
- **Gather evidence to prosecute** drone operators with advanced drone forensics
- Get cloud-based **access to critical drone data**, eliminating costly hardware installs
- Get **real-time alerts** of drones in your airspace, enabling a swift response
- Enhance facility security to improve inmate, staff, and community safety

”

“Contraband drone deliveries are quickly becoming the bane of prison officials’ existence”

— U.S. Attorney Chat Meacham
(Northern District of Texas)

Advantages of SkySafe

The most comprehensive and future-proof **Drone Detection as a Service (DDaaS)** solution

Effortless Experience

- No hardware to maintain or upgrade
- Fully scalable and always up-to-date cloud technology
- No additional resources needed
- Access anytime, anywhere, from any device

Actionable Insights

- Detects more than 95% of drones in the U.S. market, as well as the operator's location
- The most robust drone flight data set, including: real-time alerts, historical data, and forensics to detect and resolve incidents
- Fully supports the new FAA UAS Remote ID standard

Maximum ROI

- Customer success team partners to maximize the ROI of your service
- Tested and validated by the FAA and Made in the U.S.A.
- Constantly expanding capabilities and services, developed by leading experts and deployed at scale in real-time

Total Coverage

- Networked coverage model provides citywide (and beyond) airspace awareness
- Consistent, up-to-date capabilities across the entire network
- Centralized intelligence to deliver actionable insights regardless of where incidents occur

Drones Responsible for Increasing **Contraband Problem**

20 people arrested for using drones to deliver **over 100 lbs of contraband** to a South Carolina prison

A Maryland prison inmate who **recruited civilians through Instagram to deliver contraband** via drones is indicted

\$1M worth of drugs to be delivered via drones to prisons across the country is confiscated in Louisiana

4 people charged with using drones to **deliver drugs and other contraband across 9 state prisons** in California

3 men accused of using drones to drop drugs at Ohio prisons face **116 criminal counts**

As Drone Threats Evolve, So Must Your Defense

Drones used to deliver contraband can also surveil buildings, aid escape attempts, or even transport explosives.

As drone threats escalate, SkySafe equips correctional facilities with the airspace awareness needed to keep staff, inmates, and the community safe.

“As the specter of drones delivering contraband grows so does the need for new technology to detect illicit drone flights and apprehend drone operators.”
